

Daily Multi-Vitamin & Mineral Complex

This is one of the most sophisticated **Daily Multi-Vitamin and Mineral formulas** ever developed. It was specifically designed for **active lifestyle enthusiasts, athletes** and others who put their bodies through a **higher level of physical stress**.

When multi-dosed throughout the day, this formula is a key component of an "Optimal Nutrition" program – crucial for athletes as well as those changing their body composition (weight-loss or muscle gain).

Most supplements are coated with a varnish to make them smooth for swallowing and to mask its natural aroma. However, often, the human body can not break down the varnish coating resulting in limited or no uptake at all.

This Multi-Vitamin & Mineral Formula uses Pure Food Glaze as the binding agent. It allows each tablet to dissolve more quickly and to start working synergistically with the foods you just ate. You can actually break a tablet in half using your fingers.

As physically active people increase metabolism they tend to eat higher quality, whole foods. Therefore, **digestive enzymes** were a major consideration in the formulation. Digestive enzymes help break down and more *fully utilize* food.

This sophisticated **Daily Vitamin & Mineral Formula** includes **Pancreatin 5X** consisting of **Amylase, Protease** and **Lipase**. This type of enzyme is expressed in **NF units** (National Formulary).

Amylase aids in the digestion of carbohydrate. **Protease** helps with the digestion of protein and **Lipase** with fat.

The **conversion rates** are remarkable. A daily dosage of our Daily Vitamin & Mineral Formula has the equivalent capacity to digest:

Amylase:	21 slices of bread
Protease:	6.5 oz. steak
Lipase:	2.0 oz. of olive oil

These digestive enzymes adapt to their environment. For example, if you eat only two slices of bread, then, after digesting the two slices, the remaining enzyme is broken down as a protein. This is what's known as being **"amphoteric."** Enzymes also are expensive. They account for more than **35%** of manufacturing costs -- which is why you rarely, if ever, find them in retail vitamins.
